Dasar pengukuran laporan keuangan konsolidasian ini adalah konsep biaya perolehan, kecuali beberapa akun tertentu disusun berdasarkan pengukuran lain, sebagaimana diuraikan dalam kebijakan akuntansi masing-masing akun tersebut. 2. Summary of Significant Accounting and Financial Reporting Policies

Kebijakan akuntansi yang diterapkan dalam penyusunan laporan keuangan konsolidasian untuk tahun yang berakhir 31 Desember 2019 adalah konsisten dengan kebijakan akuntansi yang diterapkan dalam penyusunan laporan keuangan konsolidasian untuk tahun yang berakhir 31 Desember 2018.

Laporan arus kas konsolidasian disusun dengan menggunakan metode langsung dengan mengelompokkan arus kas dalam aktivitas operasi, investasi, dan pendanaan.

Mata uang pelaporan yang digunakan untuk penyusunan laporan keuangan konsolidasian adalah mata uang Rupiah (Rp) yang juga merupakan mata uang fungsional Perusahaan.

b. Prinsip Konsolidasian

Laporan keuangan konsolidasian meliputi laporan keuangan Perusahaan dan entitas-entitas (termasuk entitas terstruktur) yang dikendalikan oleh Perusahaan dan entitas anak (Grup). Pengendalian diperoleh apabila Grup memiliki seluruh hal berikut ini:

- kekuasaan atas *investee*;
- eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan *investee*; dan
- kemampuan untuk menggunakan kekuasaannya atas *investee* untuk mempengaruhi jumlah imbal hasil Grup.

Pengkonsolidasian entitas anak dimulai pada saat Grup memperoleh pengendalian atas entitas anak dan berakhir pada saat Grup kehilangan pengendalian atas entitas anak. Secara khusus, penghasilan dan beban entitas anak yang diakuisisi atau dilepaskan selama tahun berjalan termasuk dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian sejak tanggal Grup memperoleh pengendalian sampai dengan tanggal Grup kehilangan pengendalian atas entitas anak.

Seluruh aset dan liabilitas, ekuitas, penghasilan, beban dan arus kas dalam intra kelompok usaha terkait dengan transaksi antar entitas dalam Grup dieliminasi secara penuh dalam laporan keuangan konsolidasian.

Laba rugi dan setiap komponen penghasilan komprehensif lain diatribusikan kepada pemilik Perusahaan dan kepentingan non-pengendali (KNP) meskipun hal tersebut mengakibatkan KNP memiliki saldo defisit.

The accounting policies adopted in the preparation of the consolidated financial statements for the year ended December 31, 2019 are consistent with those adopted in the preparation of the consolidated financial statements for the year ended December 31, 2018.

The consolidated statements of cash flows are prepared using the direct method with classifications of cash flows into operating, investing, and financing activities.

The reporting currency used in the preparation of the consolidated financial statements is the Indonesian Rupiah (Rp) which is also the functional currency of the Company.

b. Principles of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiaries (the Group). Control is achieved when the Group has all the following:

- power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- the ability to use its power to affect its returns.

Consolidation of a subsidiaries begins when the Group obtains control over the subsidiaries and ceases when the Group losses control of the subsidiaries. Specifically, income and expenses of a subsidiaries acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiaries.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interest (NCI) even if this results in the NCI having a deficit balance.

KNP disajikan dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian dan dalam ekuitas pada laporan posisi keuangan konsolidasian, terpisah dari bagian yang dapat diatribusikan kepada pemilik Perusahaan.

Transaksi dengan KNP yang tidak mengakibatkan hilangnya pengendalian dicatat sebagai transaksi ekuitas. Selisih antara nilai wajar imbalan yang dialihkan dengan bagian relatif atas nilai tercatat aset bersih entitas anak yang diakuisisi dicatat di ekuitas. Keuntungan atau kerugian dari pelepasan kepada KNP juga dicatat di ekuitas.

Jika kehilangan pengendalian atas entitas anak, maka Grup:

- menghentikan pengakuan aset (termasuk setiap goodwill) dan liabilitas entitas anak;
- menghentikan pengakuan jumlah tercatat setiap KNP;
- menghentikan pengakuan akumulasi selisih penjabaran, yang dicatat di ekuitas, bila ada;
- mengakui nilai wajar pembayaran yang diterima;
- mengakui setiap sisa investasi pada nilai wajarnya;
- mengakui setiap perbedaan yang dihasilkan sebagai keuntungan atau kerugian dalam laba rugi; dan
- mereklasifikasi bagian entitas induk atas komponen yang sebelumnya diakui sebagai penghasilan komprehensif lain ke laba rugi, atau mengalihkan secara langsung ke saldo laba.

c. Kombinasi Bisnis Entitas Tidak Sepengendali

Kombinasi bisnis, dicatat dengan menggunakan metode akuisisi. Biaya perolehan dari sebuah akuisisi diukur pada nilai agregat imbalan yang dialihkan, diukur pada nilai wajar pada tanggal akuisisi dan jumlah setiap KNP pada pihak yang diakuisisi. Untuk setiap kombinasi bisnis, pihak pengakuisisi mengukur KNP pada entitas yang diakuisisi pada nilai wajar atau sebesar proporsi kepemilikan KNP atas aset neto yang teridentifikasi dari entitas yang diakuisisi. Biaya-biaya akuisisi yang timbul dibebankan langsung dan disajikan sebagai beban administrasi.

NCI are presented in the consolidated statement of profit or loss and other comprehensive income and under the equity section of the consolidated statement of financial position, separately from the corresponding portion attributable to owners of the Company.

Transactions with NCI that do not result in loss of control are accounted for as equity transactions. The difference between the fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiaries is recorded in equity. Gains or losses on disposals to NCI are also recorded in equity.

In case of loss of control over a subsidiary, the Group:

- derecognizes the assets (including goodwill) and liabilities of the subsidiary;
- derecognizes the carrying amount of any NCI;
- derecognizes the cumulative translation differences, recorded in equity, if any;
- recognizes the fair value of the consideration received;
- recognizes the fair value of any investment retained;
- recognizes any surplus or deficit in profit or loss; and
- reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate.

c. Accounting for Business Combination Among Entities Not Under Common Control

Business combinations, are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any NCI in the acquiree. For each business combination, the acquirer measures the NCI in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition related costs incurred are directly expensed and included in administrative expenses.

Ketika melakukan akuisisi atas sebuah bisnis, Grup mengklasifikasikan dan menentukan aset keuangan yang diperoleh dan liabilitas keuangan yang diambil alih berdasarkan pada persyaratan kontraktual, kondisi ekonomi dan kondisi terkait lain yang ada pada tanggal akuisisi.

Dalam suatu kombinasi bisnis yang dilakukan secara bertahap, pada tanggal akuisisi pihak pengakuisisi mengukur kembali nilai wajar kepentingan ekuitas yang dimiliki sebelumnya pada pihak yang diakuisisi dan mengakui keuntungan atau kerugian yang dihasilkan dalam laba rugi.

Pada tanggal akuisisi, goodwill awalnya diukur pada harga perolehan yang merupakan selisih lebih nilai agregat dari imbalan yang dialihkan dan jumlah yang diakui untuk KNP atas aset bersih teridentifikasi yang diperoleh dan liabilitas yang diambil alih. Jika nilai agregat tersebut lebih kecil dari nilai wajar aset neto entitas anak yang diakuisisi, selisih tersebut diakui dalam laba rugi.

Setelah pengakuan awal, goodwill diukur pada jumlah tercatat dikurangi akumulasi kerugian penurunan nilai. Untuk tujuan uji penurunan nilai, goodwill yang diperoleh dari suatu kombinasi bisnis, sejak tanggal akuisisi, dialokasikan kepada setiap Unit Penghasil Kas ("UPK") dari Perusahaan dan/atau entitas anak yang diharapkan akan menerima manfaat dari sinergi kombinasi tersebut, terlepas dari apakah aset atau liabilitas lain dari pihak yang diakuisisi dialokasikan ke UPK tersebut.

Jika goodwill telah dialokasikan pada suatu UPK dan operasi tertentu atas UPK tersebut dihentikan, maka goodwill yang diasosiasikan dengan operasi yang dihentikan tersebut termasuk dalam jumlah tercatat operasi tersebut ketika menentukan keuntungan atau kerugian dari pelepasan. Goodwill yang dilepaskan tersebut diukur berdasarkan nilai relatif operasi yang dihentikan dan porsi UPK yang ditahan.

d. Penjabaran Mata Uang Asing

Mata Uang Fungsional dan Pelaporan

Akun-akun yang tercakup dalam laporan keuangan setiap entitas dalam Grup diukur menggunakan mata uang dari lingkungan ekonomi utama dimana entitas beroperasi (mata uang fungsional).

When the Group acquires a business, it assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as of the acquisition date.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss.

At acquisition date, goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for NCI over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiaries acquired, the difference is recognized in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Company and/or its subsidiaries' cash-generating units ("CGU") that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquired are assigned to those CGUs.

Where goodwill forms part of a CGU and part of the operation within that CGU is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the CGU retained.

d. Foreign Currency Translation

Functional and Reporting Currencies

Items included in the financial statements of each of the Group's companies are measured using the currency of the primary economic environment in which the entity operates (the functional currency).

e. Transaksi Pihak Berelasi

Orang atau entitas dikategorikan sebagai pihak berelasi Grup apabila memenuhi definisi pihak berelasi berdasarkan PSAK No. 7 "Pengungkapan Pihak-pihak Berelasi".

Semua transaksi signifikan dengan pihak berelasi telah diungkapkan dalam laporan keuangan konsolidasian.

f. Kas dan Setara Kas

Kas terdiri dari kas dan bank. Setara kas adalah semua investasi milik entitas anak yang bersifat jangka pendek dan sangat likuid yang dapat segera dikonversikan menjadi kas, dengan jatuh tempo dalam waktu tiga (3) bulan atau kurang sejak tanggal penempatannya, dan yang tidak dijamin serta tidak dibatasi pencairannya.

The consolidated financial statements are presented in Rupiah which is the Group's functional and presentation currency.

Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

As of December 31, 2019 and 2018, the conversion rates used by the Group were the middle rates of Bank Indonesia as follows:

e. Transactions with Related Parties

A person or entity is considered a related party of the Group if it meets the definition of a related party in PSAK No. 7 "Related Party Disclosures".

All significant transactions with related parties are disclosed in the consolidated financial statements.

f. Cash and Cash Equivalents

Cash consists of cash on hand and in banks. Cash equivalents are short-term, highly liquid investments, owned by subsidiaries, that are readily convertible to known amounts of cash with original maturities of three (3) months or less from the date of placements, and which are not used as collateral and are not restricted.

g. Kas dan Setara Kas yang Dibatasi Penggunaannya

Bank dan deposito yang dijaminkan atau dibatasi penggunaannya, disajikan sebagai "Kas dan setara kas yang dibatasi penggunaannya".

h. Instrumen Keuangan

Pembelian atau penjualan yang reguler atas instrumen keuangan diakui pada tanggal transaksi.

Instrumen keuangan pada pengakuan awal diukur pada nilai wajarnya, yang merupakan nilai wajar kas yang diserahkan (dalam hal aset keuangan) atau yang diterima (dalam hal liabilitas keuangan). Nilai wajar kas yang diserahkan atau diterima ditentukan dengan mengacu pada harga transaksi atau harga pasar yang berlaku. Jika harga pasar tidak dapat ditentukan dengan andal, maka nilai wajar kas yang diserahkan atau diterima dihitung berdasarkan estimasi jumlah seluruh pembayaran atau penerimaan kas masa depan, yang didiskontokan menggunakan suku bunga pasar yang berlaku untuk instrumen sejenis dengan jatuh tempo yang sama atau hampir sama. Pengukuran awal instrumen keuangan termasuk biaya transaksi, kecuali untuk instrumen keuangan yang diukur pada nilai wajar melalui laba rugi.

Biaya transaksi diamortisasi sepanjang umur instrumen menggunakan metode suku bunga efektif.

Pengklasifikasian instrumen keuangan dilakukan berdasarkan tujuan perolehan instrumen tersebut dan mempertimbangkan apakah instrumen tersebut memiliki kuotasi harga di pasar aktif.

Pada tanggal 31 Desember 2019 dan 2018, Grup memiliki instrumen keuangan dalam kategori pinjaman yang diberikan dan piutang, investasi yang dimiliki hingga jatuh tempo, aset keuangan tersedia untuk dijual, dan liabilitas keuangan lain-lain. Oleh karena itu, kebijakan akuntansi terkait dengan instrumen keuangan dalam kategori aset keuangan yang diukur melalui laba rugi dan liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi tidak diungkapkan.

g. Restricted Cash and Cash Equivalents

Cash in banks and time deposits which are used as collateral or restricted, are presented as "Restricted cash and cash equivalents".

h. Financial Instruments

All regular way purchases and sales of financial instruments are recognized on the transaction date.

Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The fair value of the consideration given or received is determined by reference to the transaction price or other market prices. If such market prices are not reliably determinable, the fair value of the consideration is estimated as the sum of all future cash payments or receipts, discounted using the prevailing market rates of interest for similar instruments with similar maturities. The initial measurement of financial instruments, except for financial instruments at fair value through profit and loss (FVPL), includes transaction costs.

Transaction costs are amortized over the terms of the instruments based on the effective interest rate method.

The classification of the financial instruments depends on the purpose for which the instruments were acquired and whether they are quoted in an active market.

As of December 31, 2019 and 2018, the Group has financial instruments under loans and receivables, held-to-maturity (HTM) investments, available for sale (AFS) financial assets, and other financial liabilities categories. Thus, accounting policies related to financial assets at FVPL, and financial liabilities at FVPL were not disclosed.

Aset Keuangan

(1) Pinjaman yang Diberikan dan Piutang

Pinjaman yang diberikan dan piutang adalah aset keuangan non-derivatif dengan pembayaran tetap atau telah ditentukan dan tidak mempunyai kuotasi di pasar aktif, yang selanjutnya diukur pada biaya perolehan diamortisasi menggunakan metode suku bunga efektif, dikurangi cadangan kerugian penurunan nilai.

Pada tanggal 31 Desember 2019 dan 2018, kategori ini meliputi kas dan setara kas, piutang lain-lain, investasi - deposito berjangka, kas dan setara kas yang dibatasi penggunaannya, dan aset lain-lain - uang jaminan yang dimiliki oleh Grup.

(2) Investasi Dimiliki Hingga Jatuh Tempo

Investasi dimiliki hingga jatuh tempo adalah aset keuangan non-derivatif dengan pembayaran tetap atau telah ditentukan dan jatuh temponya telah ditetapkan, dan manajemen Grup memiliki intensi positif dan kemampuan untuk memiliki aset keuangan tersebut hingga jatuh tempo. Apabila Grup menjual atau mereklasifikasi investasi dimiliki hingga jatuh tempo dalam jumlah yang lebih dari jumlah yang tidak signifikan sebelum jatuh tempo, maka seluruh aset keuangan dalam kategori tersebut terkena aturan pembatasan (*tainting rule*) dan harus direklasifikasi ke kelompok tersedia untuk dijual.

Investasi ini selanjutnya diukur pada biaya perolehan diamortisasi menggunakan metode suku bunga efektif, setelah dikurangi penurunan nilai.

Pada tanggal 31 Desember 2019 dan 2018, kategori ini meliputi investasi Grup dalam obligasi.

Financial Assets

(1) Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are subsequently measured at amortized cost using the effective interest rate method, less any allowance for any impairment.

As of December 31, 2019 and 2018, the Group's cash and cash equivalents, other accounts receivable, investments - time deposits, restricted cash and cash equivalents, and other assets - security deposits are included in this category.

(2) HTM Investments

HTM investments are non-derivative financial assets with fixed or determinable payments and fixed maturities for which the Group's management has the positive intention and ability to hold to maturity. When the Group sells or reclassifies other than an insignificant amount of HTM investments before maturity, the entire category would be tainted and reclassified as AFS financial assets.

These investments are subsequently measured at amortized cost using the effective interest method, less any impairment in value.

As of December 31, 2019 and 2018, the Group's investments in bonds are classified in this category.

(3) Aset Keuangan Tersedia untuk Dijual

Aset keuangan tersedia untuk dijual merupakan aset yang ditetapkan sebagai tersedia untuk dijual atau tidak diklasifikasikan dalam kategori instrumen keuangan yang lain, dan selanjutnya diukur pada nilai wajar, dengan keuntungan atau kerugian yang belum direalisasi diakui pada bagian ekuitas sampai aset keuangan tersebut dihentikan pengakuannya atau dianggap telah mengalami penurunan nilai, dimana pada saat itu akumulasi keuntungan atau kerugian direklasifikasi ke laba rugi.

Pada tanggal 31 Desember 2019 dan 2018, kategori ini meliputi investasi Grup dalam efek ekuitas, efek utang, dan saham pada perusahaan lain.

Karena nilai wajarnya tidak dapat ditentukan secara andal, maka investasi Grup dalam saham sebagaimana diungkapkan dalam Catatan 10 dinyatakan pada biaya perolehan, setelah dikurangi penurunan nilai, jika ada.

Liabilitas Keuangan

Liabilitas Keuangan Lain-lain

Kategori ini merupakan liabilitas keuangan yang tidak dimiliki untuk diperdagangkan atau pada saat pengakuan awal tidak ditetapkan untuk diukur pada nilai wajar melalui laba rugi.

Instrumen keuangan yang diterbitkan atau komponen dari instrumen keuangan tersebut, yang tidak diklasifikasikan sebagai liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi, diklasifikasikan sebagai liabilitas keuangan lain-lain, jika substansi perjanjian kontraktual mengharuskan Grup untuk menyerahkan kas atau aset keuangan lain kepada pemegang instrumen keuangan, atau jika liabilitas tersebut diselesaikan tidak melalui penukaran kas atau aset keuangan lain atau saham sendiri yang jumlahnya tetap atau telah ditetapkan.

(3) AFS Financial Assets

AFS financial assets are those which are designated as such or not classified in any of the other categories and are subsequently measured at fair value with unrealized gains or losses recognized in equity until the investment is derecognized, or determined to be impaired, at which time the cumulative gain or loss is reclassified to profit or loss.

As of December 31, 2019 and 2018, the Group's investments in AFS equity securities, debt securities, and shares of stocks of other companies are classified under this category.

In the absence of a reliable basis for determining the fair value, the Group's investments in shares of stock of other companies enumerated in Note 10 are carried at cost, net of any impairment.

Financial Liabilities

Other Financial Liabilities

This category pertains to financial liabilities that are not held for trading or not designated at FVPL upon the inception of the liability.

Issued financial instruments or their components, which are not classified as financial liabilities at FVPL are classified as other financial liabilities, where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

Liabilitas keuangan lain-lain selanjutnya diukur pada biaya perolehan diamortisasi berdasarkan suku bunga efektif.

Pada tanggal 31 Desember 2019 dan 2018, kategori ini meliputi utang komisi, dan utang lain-lain Grup.

Saling Hapus Instrumen Keuangan

Aset keuangan dan liabilitas keuangan saling hapus dan nilai bersihnya disajikan dalam laporan posisi keuangan konsolidasian jika, dan hanya jika, Grup saat ini memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut; dan berniat untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan.

Penurunan Nilai Aset Keuangan

Pada setiap tanggal laporan posisi keuangan, manajemen Grup menelaah apakah suatu aset keuangan atau kelompok aset keuangan telah mengalami penurunan nilai.

(1) Aset keuangan pada biaya perolehan diamortisasi

Manajemen pertama-tama menentukan apakah terdapat bukti obyektif mengenai penurunan nilai secara individual atas aset keuangan yang signifikan secara individual, dan secara individual atau kolektif untuk aset keuangan yang jumlahnya tidak signifikan secara individual. Jika manajemen menentukan tidak terdapat bukti obyektif mengenai penurunan nilai atas aset keuangan yang dinilai secara individual, baik aset keuangan tersebut signifikan atau tidak signifikan, maka aset tersebut dimasukkan ke dalam kelompok aset keuangan yang memiliki karakteristik risiko kredit yang sejenis dan menilai penurunan nilai kelompok tersebut secara kolektif. Aset yang penurunan nilainya dinilai secara individual, dan untuk itu kerugian penurunan nilai diakui atau tetap diakui, tidak termasuk dalam penilaian penurunan nilai secara kolektif.

Other financial liabilities are subsequently carried at amortized cost using the effective interest rate method.

As of December 31, 2019 and 2018, the Group's commissions payable, and other accounts payable are included in this category.

Offsetting of Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable right to offset the recognized amounts and there is intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Impairment of Financial Assets

The Group's management assesses at each consolidated statement of financial position date whether a financial asset or group of financial assets is impaired.

(1) Assets Carried at Amortized Cost

The management first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the management determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss, is or continues to be recognized are not included in a collective assessment of impairment.

Jika terdapat bukti obyektif bahwa rugi penurunan nilai telah terjadi, maka jumlah kerugian tersebut diukur sebagai selisih antara nilai tercatat aset dengan nilai kini estimasi arus kas masa depan yang didiskonto menggunakan suku bunga efektif awal dari aset tersebut. Nilai tercatat aset tersebut langsung dikurangi dengan penurunan nilai yang terjadi atau menggunakan akun cadangan dan jumlah kerugian yang terjadi diakui dalam laba rugi.

Jika, pada tahun berikutnya, jumlah kerugian penurunan nilai berkurang karena suatu peristiwa yang terjadi setelah penurunan nilai tersebut diakui, maka dilakukan penyesuaian atas cadangan kerugian penurunan nilai yang sebelumnya diakui. Pemulihan penurunan nilai selanjutnya diakui dalam laba rugi, dengan ketentuan nilai tercatat aset setelah pemulihan penurunan nilai tidak melampaui biaya perolehan diamortisasi pada tanggal pemulihan tersebut.

(2) Aset keuangan yang dicatat pada biaya perolehan

Jika terdapat bukti obyektif bahwa kerugian penurunan nilai telah terjadi atas instrumen ekuitas yang tidak memiliki kuotasi harga di pasar aktif dan tidak diukur pada nilai wajar karena nilai wajarnya tidak dapat diukur secara andal, maka jumlah kerugian penurunan nilai diukur berdasarkan selisih antara nilai tercatat aset keuangan dengan nilai kini dari estimasi arus kas masa depan yang didiskontokan pada tingkat pengembalian yang berlaku di pasar untuk aset keuangan serupa.

(3) Aset keuangan tersedia untuk dijual

Dalam hal instrumen ekuitas dalam kelompok tersedia untuk dijual, penelaahan penurunan nilai ditandai dengan penurunan nilai wajar dibawah biaya perolehannya yang signifikan dan berkelanjutan. Jika terdapat bukti obyektif penurunan nilai, maka kerugian penurunan nilai kumulatif yang dihitung dari selisih antara biaya perolehan dengan nilai wajar kini, dikurangi kerugian penurunan nilai yang sebelumnya telah diakui dalam laba rugi, dikeluarkan dari ekuitas dan diakui dalam laba rugi. Kerugian penurunan nilai tidak boleh dipulihkan melalui laba rugi. Kenaikan nilai wajar setelah terjadinya penurunan nilai diakui di ekuitas.

If there is an objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of loss is charged to profit or loss.

If, in a subsequent year, the amount of the impairment loss decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in profit or loss, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

(2) Assets Carried at Cost

If there is an objective evidence that an impairment loss has been incurred on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

(3) AFS Financial Assets

In case of equity investments classified as AFS, assessment of any impairment would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in profit or loss is removed from equity and recognized in profit or loss. Impairment losses on equity investments are not reversed through profit or loss. Increases in fair value after impairment are recognized directly in equity.

Dalam hal instrumen utang dalam kelompok tersedia untuk dijual, penurunan nilai ditelaah berdasarkan kriteria yang sama dengan aset keuangan yang dicatat pada biaya perolehan diamortisasi. Bunga tetap diakru berdasarkan suku bunga efektif asal yang diterapkan pada nilai tercatat aset yang telah diturunkan nilainya, dan dicatat sebagai bagian dari pendapatan bunga. Jika, pada tahun berikutnya, nilai wajar instrumen utang meningkat dan peningkatan nilai wajar tersebut karena suatu peristiwa yang terjadi setelah penurunan nilai tersebut diakui dalam laba rugi, maka penurunan nilai yang sebelumnya diakui harus dipulihkan melalui laba rugi.

Penghentian Pengakuan Aset dan Liabilitas Keuangan

(1) Aset Keuangan

Aset keuangan (atau bagian dari kelompok aset keuangan serupa) dihentikan pengakuannya jika:

- a. hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir;
- b. Grup tetap memiliki hak untuk menerima arus kas dari aset keuangan tersebut, namun juga menanggung kewajiban kontraktual untuk membayar kepada pihak ketiga atas arus kas yang diterima tersebut secara penuh tanpa adanya penundaan yang signifikan berdasarkan suatu kesepakatan; atau
- c. Grup telah mentransfer haknya untuk menerima arus kas dari aset keuangan dan (i) telah mentransfer secara substansial seluruh risiko dan manfaat atas aset keuangan, atau (ii) secara substansial tidak mentransfer atau tidak memiliki seluruh risiko dan manfaat atas aset keuangan, namun telah mentransfer pengendalian atas aset keuangan tersebut.

In the case of debt instruments classified as AFS, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Interest continues to be accrued at the original effective interest rate on the reduced carrying amount of the asset and is recorded as part of interest income. If, in subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed through profit or loss.

Derecognition of Financial Assets and Liabilities

(1) Financial Assets

Financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- a. the rights to receive cash flows from the asset have expired;
- b. the Group retains the right to receive cash flows from the asset, but has assumed a contractual obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- c. the Group has transferred its rights to receive cash flows from the asset and either (i) has transferred substantially all the risks and rewards of the asset, or (ii) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

(2) Liabilitas Keuangan

Liabilitas keuangan dihentikan pengakuannya jika liabilitas keuangan tersebut berakhir, dibatalkan, atau telah kadaluarsa.

i. Pengukuran Nilai Wajar

Pengukuran nilai wajar didasarkan pada asumsi bahwa transaksi untuk menjual aset atau mengalihkan liabilitas akan terjadi:

- di pasar utama untuk aset atau liabilitas tersebut atau;
- jika tidak terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

Grup harus memiliki akses ke pasar utama atau pasar yang paling menguntungkan pada tanggal pengukuran.

Nilai wajar aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset atau liabilitas tersebut, dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

Ketika Grup menggunakan teknik penilaian, maka Grup memaksimalkan penggunaan input yang dapat diobservasi yang relevan dan meminimalkan penggunaan input yang tidak dapat diobservasi.

Seluruh aset dan liabilitas yang mana nilai wajar aset atau liabilitas tersebut diukur atau diungkapkan, dikategorikan dalam hierarki nilai wajar sebagai berikut:

- Level 1 – harga kuotasi (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik;
- Level 2 – teknik penilaian dimana level input terendah yang signifikan terhadap pengukuran nilai wajar dapat diobservasi, baik secara langsung maupun tidak langsung;
- Level 3 – teknik penilaian dimana level input terendah yang signifikan terhadap pengukuran nilai wajar tidak dapat diobservasi.

(2) Financial Liabilities

A financial liability is derecognized when the obligation under the contract is discharged, cancelled or has expired.

i. Fair Value Measurement

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability or;
- in the absence of a principal market, in the most advantageous market for the asset or liability.

The Group must have access to the principal or the most advantageous market at the measurement date.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

When the Group uses valuation techniques, it maximizes the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy as follows:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Untuk aset dan liabilitas yang diukur pada nilai wajar secara berulang dalam laporan keuangan konsolidasian, maka Grup menentukan apakah telah terjadi transfer di antara level hierarki dengan menilai kembali pengkategorian level nilai wajar pada setiap akhir periode pelaporan.

j. Investasi pada Entitas Asosiasi

Hasil usaha dan aset dan liabilitas entitas asosiasi dicatat dalam laporan keuangan konsolidasian menggunakan metode ekuitas.

Dalam metode ekuitas, pengakuan awal investasi pada entitas asosiasi diakui pada laporan posisi keuangan konsolidasian sebesar biaya perolehan dan selanjutnya disesuaikan untuk mengakui bagian Grup atas laba rugi dan penghasilan komprehensif lain dari entitas asosiasi. Jika bagian Grup atas rugi entitas asosiasi adalah sama dengan atau melebihi kepentingannya pada entitas asosiasi, maka Grup menghentikan pengakuannya atas rugi lebih lanjut. Kerugian lebih lanjut diakui hanya jika Grup memiliki kewajiban konstruktif atau hukum atau melakukan pembayaran atas nama entitas asosiasi.

Pada setiap tanggal pelaporan, Grup menentukan apakah terdapat penurunan nilai yang harus diakui atas investasi Grup pada entitas asosiasi.

k. Piutang Premi dan Piutang Reasuransi

Piutang premi meliputi tagihan premi kepada tertanggung/agen/broker sebagai akibat transaksi asuransi. Dalam hal Grup memberikan potongan premi kepada tertanggung, maka potongan tersebut langsung dikurangkan dari piutang preminya.

Grup menelaah penurunan piutang secara berkala. Jika ada bukti obyektif bahwa piutang tersebut mengalami penurunan nilai, Grup mengurangi nilai tercatat piutang sebesar jumlah yang dapat dipulihkan dan mengakui rugi penurunan nilai dalam laba rugi. Grup mengumpulkan bukti obyektif bahwa terdapat penurunan nilai piutang dengan menggunakan proses yang diterapkan untuk aset keuangan yang diukur pada biaya perolehan diamortisasi.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether there are transfers between levels in the hierarchy by re-assessing categorization at the end of each reporting period.

j. Investments in Associates

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting.

Under the equity method, an investment in an associate is initially recognized in the consolidated statement of financial position at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate, the Group discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether it is necessary to recognize any impairment loss with respect to the Group's investment in an associate.

k. Premiums and Reinsurance Receivables

Premiums receivable consist of receivables from policyholders, agents or brokers resulting from an insurance transaction. In conditions where the Group gives premium discount to policyholders, the discount is reduced directly from the related premiums receivable.

The Group assesses its receivables for impairment on a regular basis. If there is an objective evidence that these receivables are impaired, the Group reduces the carrying amounts of the receivables to their recoverable amounts and recognize that impairment loss in profit or loss. The Group gathers the objective evidence that a receivable is impaired using the same process adopted for financial assets held at amortized cost.

Rugi penurunan nilai tersebut juga dihitung mengikuti metode yang sama yang digunakan untuk aset keuangan yang dijelaskan pada Catatan 2h.

I. Properti Investasi

Properti investasi diukur sebesar nilai wajarnya, termasuk biaya transaksi. Nilai wajar properti investasi ditentukan berdasarkan laporan penilai independen yang dilakukan secara berkala berdasarkan keputusan manajemen. Nilai wajar properti investasi termasuk biaya penggantian untuk bagian tertentu dari properti investasi yang telah ada pada saat beban terjadi, jika kriteria pengakuan terpenuhi, dan tidak termasuk biaya perawatan sehari-hari properti investasi.

Keuntungan atau kerugian yang timbul dari perubahan nilai wajar atas properti investasi diakui dalam laba rugi pada saat terjadinya.

Properti investasi dihentikan pengakuannya (dikeluarkan dari laporan posisi keuangan konsolidasian) pada saat pelepasan atau ketika properti investasi tersebut tidak digunakan lagi secara permanen dan tidak memiliki manfaat ekonomis di masa depan yang dapat diharapkan pada saat pelepasannya. Keuntungan atau kerugian yang timbul dari penghentian atau pelepasan properti investasi diakui dalam laba rugi dalam tahun terjadinya penghentian atau pelepasan tersebut.

Transfer ke properti investasi dilakukan jika, dan hanya jika, terdapat perubahan penggunaan, yang ditunjukkan dengan berakhirnya pemakaian oleh pemilik, dimulainya sewa operasi ke pihak lain atau berakhirnya konstruksi atau pengembangan. Transfer dari properti investasi dilakukan jika, dan hanya jika, terdapat perubahan penggunaan, yang ditunjukkan dengan dimulainya penggunaan oleh pemilik atau dimulainya pengembangan untuk dijual.

m. Aset Tetap

Aset tetap, kecuali tanah, dinyatakan berdasarkan biaya perolehan, tetapi tidak termasuk biaya perawatan sehari-hari, dikurangi akumulasi penyusutan dan akumulasi rugi penurunan nilai, jika ada. Tanah tidak disusutkan dan dinyatakan berdasarkan biaya perolehan dikurangi akumulasi rugi penurunan nilai, jika ada.

The impairment loss is also calculated following the same method used for these financial assets described in Note 2h.

I. Investment Properties

Investment properties are measured at fair values, including transaction costs. Fair values of investment properties are determined based on regular independent appraisal reports, as decided by the management. Fair value of investment properties includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met, and excludes the costs of day-to-day servicing of an investment property.

Gains or losses from changes in fair value of investment property are recognized in current period when incurred.

Investment properties are derecognized when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in profit or loss in the year of retirement or disposal.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by ending of owner-occupation, commencement of an operating lease to another party or ending of construction or development. Transfers are made from investment properties when, and only when, there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale.

m. Property and Equipment

Property and equipment, except land, are carried at cost, excluding day-to-day servicing, less accumulated depreciation and any impairment in value. Land is not depreciated and is stated at cost less any impairment in value, if any.

Biaya perolehan awal aset tetap meliputi harga perolehan, termasuk bea impor dan pajak pembelian yang tidak boleh dikreditkan dan biaya-biaya yang dapat diatribusikan secara langsung untuk membawa aset ke lokasi dan kondisi yang diinginkan sesuai dengan tujuan penggunaan yang ditetapkan.

Biaya pengurusan legal hak atas tanah ketika tanah diperoleh pertama kali diakui sebagai bagian dari biaya perolehan tanah, dan biaya ini tidak disusutkan. Biaya pengurusan perpanjangan atau pembaruan legal hak atas tanah diakui sebagai aset takberwujud dan diamortisasi sepanjang umur hukum hak atas tanah.

Beban-beban yang timbul setelah aset tetap digunakan, seperti beban perbaikan dan pemeliharaan, dibebankan ke laba rugi pada saat terjadinya. Apabila beban-beban tersebut menimbulkan peningkatan manfaat ekonomis di masa datang dari penggunaan aset tetap tersebut yang dapat melebihi kinerja normalnya, maka beban-beban tersebut dikapitalisasi sebagai tambahan biaya perolehan aset tetap. Bangunan disusutkan dengan menggunakan metode garis lurus (*straight-line method*) dan aset tetap lainnya disusutkan dengan menggunakan metode saldo menurun ganda (*double-declining balance method*) berdasarkan taksiran masa manfaat ekonomis dari aset tetap sebagai berikut:

Bangunan/Buildings
Peralatan komputer/ *Computer equipment*
Kendaraan bermotor sewaan/ *Leased Motor vehicles*
Inventaris kantor/ *Office furniture and fixtures*
Kendaraan bermotor/ *Motor vehicles*

Nilai tercatat aset tetap ditelaah kembali dan dilakukan penurunan nilai apabila terdapat peristiwa atau perubahan kondisi tertentu yang mengindikasikan nilai tercatat tersebut tidak dapat dipulihkan sepenuhnya.

Dalam setiap inspeksi yang signifikan, biaya inspeksi diakui dalam jumlah tercatat aset tetap sebagai suatu penggantian apabila memenuhi kriteria pengakuan. Biaya inspeksi signifikan yang dikapitalisasi tersebut diamortisasi selama periode sampai dengan saat inspeksi signifikan berikutnya.

The initial cost of property and equipment consists of its purchase price, including import duties and taxes and any directly attributable costs in bringing the property and equipment to its working condition and location for its intended use.

Initial legal costs incurred to obtain legal rights are recognized as part of the acquisition cost of the land, and these costs are not depreciated. Costs related to renewal of land rights are recognized as intangible assets and amortized during the period of the land rights.

Expenditures incurred after the property and equipment have been put into operations, such as repairs and maintenance costs, are normally charged to operations in the year such costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of the property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property and equipment. Buildings are depreciated using the straight-line method, while other property and equipment items are depreciated using the double-declining balance method over the property and equipment's useful lives as follows:

20 Tahun/Years
4 Tahun/Years

5 Tahun/Years
4 Tahun/Years
4 Tahun/Years

The carrying values of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be recoverable.

When each major inspection is performed, its cost is recognized in the carrying amount of the item of property and equipment as a replacement if the recognition criteria are satisfied. Such major inspection is capitalized and amortized over the next major inspection activity.

Jumlah tercatat aset tetap dihentikan pengakuannya pada saat dilepaskan atau tidak ada manfaat ekonomis masa depan yang diharapkan dari penggunaan atau pelepasannya. Keuntungan atau kerugian pengakuan aset tetap diakui dalam laba rugi pada tahun terjadinya penghentian pengakuan.

Nilai residu, umur manfaat, serta metode penyusutan ditelaah setiap akhir tahun dan dilakukan penyesuaian apabila hasil telaah berbeda dengan estimasi sebelumnya.

n. Goodwill

Goodwill merupakan selisih lebih biaya perolehan akuisisi atas nilai wajar kepemilikan Grup pada aset teridentifikasi milik entitas anak yang diakuisisi pada tanggal akuisisi.

Goodwill diuji penurunan nilainya setiap tahun dan dicatat sebesar biaya perolehan dikurangi dengan akumulasi penurunan nilai. Penurunan nilai goodwill tidak dapat dipulihkan. Keuntungan atau kerugian yang diakui pada saat pelepasan entitas anak harus memperhitungkan nilai tercatat goodwill dari entitas anak yang dijual tersebut.

Goodwill dialokasikan ke UPK untuk tujuan uji penurunan nilai. Alokasi dilakukan ke UPK atau kelompok UPK yang diharapkan akan mendapat manfaat dari kombinasi bisnis yang menimbulkan goodwill tersebut.

o. Transaksi Sewa

Penentuan apakah suatu kontrak merupakan atau mengandung unsur sewa adalah berdasarkan substansi kontrak pada tanggal awal sewa, yakni apakah pemenuhan syarat kontrak tergantung pada penggunaan aset tertentu dan kontrak tersebut berisi hak untuk menggunakan aset tersebut.

Perlakuan Akuntansi untuk Lessee

Sewa pembayaran, yang mengalihkan secara substansial seluruh risiko dan manfaat yang terkait dengan kepemilikan suatu aset kepada Grup, dikapitalisasi pada awal sewa sebesar nilai wajar aset sewaan atau sebesar nilai kini dari pembayaran sewa minimum, jika nilai kini lebih rendah dari nilai wajar. Pembayaran sewa dipisahkan antara bagian yang merupakan beban keuangan dan bagian yang merupakan pelunasan liabilitas sehingga menghasilkan suatu suku bunga periodik yang konstan atas saldo liabilitas. Beban keuangan dibebankan ke laba rugi tahun berjalan.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gains or loss arising from de-recognition of property and equipment is included in profit or loss in the year the item is derecognized.

The asset's residual values, if any, useful lives and depreciation method are reviewed and adjusted if appropriate, at each financial year end.

n. Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of Group's share of the net identifiable assets of the acquired subsidiary at the date of acquisition.

Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to CGU for the purpose of impairment testing. The allocation is made to those CGU or groups of CGU that are expected to benefit from the business combination in which the goodwill arose.

o. Leased Transactions

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement at inception date of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the assets.

Accounting Treatment as a Lessee

Leases which transfer to the Group substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease at the fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest in the remaining balance of the liability. Finance charges are recognized in profit or loss.

Aset sewaan disusutkan sepanjang estimasi umur manfaatnya. Apabila tidak terdapat keyakinan memadai bahwa Grup akan memperoleh hak kepemilikan atas aset tersebut pada akhir masa sewa, maka aset sewaan disusutkan sepanjang estimasi umur manfaat aset atau masa sewa, mana yang lebih pendek. Pembayaran sewa dalam sewa operasi diakui sebagai beban dalam laba rugi dengan dasar garis lurus (*straight-line basis*) selama masa sewa.

p. Saham Treasuri

Pada saat Perusahaan membeli kembali saham Perusahaan (saham treasuri), maka imbalan yang dibayarkan, termasuk biaya-biaya transaksi inkremental yang teratribusikan langsung (bersih setelah pajak penghasilan), dikurangkan dari ekuitas yang dapat diatribusikan kepada pemegang saham Perusahaan sampai dengan saham tersebut dibatalkan atau diterbitkan kembali. Jika saham tersebut kemudian diterbitkan kembali, maka setiap imbalan yang diterima, setelah dikurangkan dengan biaya-biaya transaksi inkremental yang teratribusikan langsung dan dampak pajak penghasilan, dibukukan pada ekuitas yang dapat diatribusikan kepada pemegang saham Perusahaan.

q. Distribusi Dividen

Distribusi dividen kepada pemegang saham Grup diakui sebagai liabilitas dalam laporan keuangan konsolidasian dalam periode saat dividen tersebut disetujui oleh pemegang saham Grup.

r. Biaya Tangguhan

Hak Atas Tanah

Biaya yang terjadi sehubungan dengan pengurusan legal hak atas tanah ditangguhkan dan diamortisasi dengan metode garis lurus sepanjang umur hukum hak atas tanah karena umur hukum hak atas tanah lebih pendek dari umur ekonomisnya.

s. Penurunan Nilai Aset Non-Keuangan

Pada setiap akhir periode pelaporan tahunan, Grup menelaah apakah terdapat indikasi suatu aset mengalami penurunan nilai. Jika terdapat indikasi tersebut atau pada saat uji tahunan penurunan nilai aset perlu dilakukan, maka Grup membuat estimasi jumlah terpulihkan aset tersebut.

Capitalized leased assets are depreciated over the estimated useful life of the assets except if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, in which case the lease assets are depreciated over the shorter of the estimated useful life of the assets and the lease term. Operating lease payments are recognized as an expense in profit or loss on a straight-line basis over the lease term.

p. Treasury Shares

Where the Company purchases the Company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental transaction costs (net of income taxes) is deducted from equity attributable to the Company's equity holders until the shares are cancelled or reissued. Where such ordinary share are subsequently reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the Company's equity holders.

q. Dividend Distributions

Dividend distribution to the Group's shareholders is recognized as a liability in the consolidated financial statements in the period in which the dividends are approved by the Group's shareholders.

r. Deferred Charges

Landrights

Costs related to the legal processing of landrights were deferred and are being amortized using the straight-line method over the legal term of the landright which is shorter than the economic life of the land.

s. Impairment of Non-Financial Assets

The Group assesses at each annual reporting period whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset's recoverable amount.

Jika nilai tercatat aset lebih besar daripada nilai terpulihkannya, maka aset tersebut dinyatakan mengalami penurunan nilai dan rugi penurunan nilai diakui dalam laba rugi. Dalam menghitung nilai pakai, estimasi arus kas masa depan bersih didiskontokan ke nilai kini dengan menggunakan tingkat diskonto sebelum pajak yang mencerminkan penilaian pasar kini dari nilai waktu uang dan risiko spesifik atas aset.

Penelaahan dilakukan pada akhir setiap periode pelaporan tahunan untuk mengetahui apakah terdapat indikasi bahwa rugi penurunan nilai aset yang telah diakui dalam periode sebelumnya mungkin tidak ada lagi atau mungkin telah menurun. Jika indikasi dimaksud ditemukan, maka Grup mengestimasi jumlah terpulihkan aset tersebut. Kerugian penurunan nilai yang diakui dalam periode sebelumnya akan dipulihkan apabila nilai tercatat aset tidak melebihi jumlah terpulihkannya maupun nilai tercatat, neto setelah penyusutan, seandainya tidak ada rugi penurunan nilai yang telah diakui untuk aset tersebut pada tahun-tahun sebelumnya. Setelah pemulihan tersebut, penyusutan aset tersebut disesuaikan di periode mendatang untuk mengalokasikan nilai tercatat aset yang direvisi, dikurangi nilai sisanya, dengan dasar yang sistematis selama sisa umur manfaatnya.

t. Kontrak Asuransi

Kontrak asuransi adalah kontrak dimana penanggung menerima risiko asuransi signifikan dari tertanggung. Risiko asuransi signifikan didefinisikan sebagai kemungkinan membayar manfaat signifikan kepada tertanggung jika suatu kejadian yang diasuransikan terjadi dibandingkan dengan manfaat minimum yang akan dibayarkan apabila risiko yang diasuransikan tidak terjadi.

Pengakuan Pendapatan Premi

Premi dari kontrak asuransi dan reasuransi jangka pendek diakui sebagai pendapatan sesuai periode polis (kontrak) berdasarkan proporsi jumlah proteksi yang diberikan. Premi dari polis bersama diakui sebesar pangsa premi Perusahaan. Premi hak reasuradur diakui sebagai premi asuransi selama periode kontrak reasuransi secara proporsional dengan proteksi yang diperoleh.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and impairment losses are recognized in profit or loss. In assessing the value in use, the estimated net future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An assessment is made at each annual reporting period as to whether there is any indication that previously recognized impairment losses recognized for an asset may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss for an asset is reversed in profit or loss to the extent that the carrying amount of the assets does not exceed its recoverable amount nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. After such a reversal, the depreciation charge on the said asset is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

t. Insurance Contract

Insurance contract is a contract under which the insurer accepts significant risk from the insured. Significant insurance risk is defined as the possibility of paying significantly more benefit to the insured upon the occurrence of insured event compared to the minimum benefit if the event does not occur.

Premium Income Recognition

Premiums on insurance and reinsurance contracts with short-term period are recognized as revenue over the policy contract period in proportion to the insurance coverage provided. Premium from coinsurance is recognized as income based on the Company's proportionate share in the premium. Premium due to reinsurance company is recognized as reinsurance premium during the period of reinsurance contract in proportion to the insurance coverage received.

Premi belum merupakan pendapatan dari kontrak asuransi jangka pendek ditentukan untuk masing-masing jenis pertanggungan dihitung berdasarkan premi neto sesuai dengan proporsi jumlah hari sampai dengan polis berakhir (proporsional harian).

Kenaikan atau penurunan premi yang belum merupakan pendapatan adalah selisih antara saldo premi yang belum merupakan pendapatan tahun berjalan dan tahun lalu.

Premi kontrak asuransi jangka panjang diakui sebagai pendapatan pada saat jatuh tempo dari pemegang polis.

Perusahaan mereasuransikan sebagian risiko atas akseptasi pertanggungan yang diperoleh kepada perusahaan asuransi lain dan perusahaan reasuransi. Jumlah premi dibayar atau bagian premi atas transaksi reasuransi prospektif diakui sebagai premi reasuransi sesuai periode kontrak reasuransi secara proporsional dengan proteksi yang diberikan. Pembayaran atau kewajiban atas transaksi reasuransi retrospektif diakui sebagai piutang reasuransi sebesar kewajiban yang dibukukan sehubungan kontrak reasuransi tersebut.

Beban Klaim

Beban klaim meliputi klaim disetujui (*settled claims*), klaim dalam proses penyelesaian termasuk klaim yang terjadi namun belum dilaporkan dan beban penyelesaian klaim. Beban klaim tersebut diakui sebagai beban pada saat timbulnya kewajiban untuk memenuhi klaim. Bagian klaim reasuradur diakui dan dicatat sebagai pengurang beban klaim pada periode yang sama dengan periode pengakuan beban klaim. Hak subrogasi diakui sebagai pengurang beban klaim pada saat realisasi.

Jumlah klaim dalam proses penyelesaian (estimasi klaim) dihitung berdasarkan estimasi kerugian dari klaim yang pada tanggal laporan posisi keuangan konsolidasian masih dalam proses penyelesaian, termasuk klaim yang sudah terjadi namun belum dilaporkan. Perubahan dalam estimasi klaim diakui dalam laba rugi pada tahun terjadinya perubahan. Kenaikan (penurunan) estimasi klaim adalah selisih antara klaim tahun berjalan dengan tahun lalu.

Unearned premiums on short-term insurance contract determined for each kind of business are calculated based on net premium in proportion to the number of days until the policy expires (proportional daily).

The increase or decrease in unearned premiums represents the difference of the balances of unearned premiums between the current and the prior year.

Premiums on long-term insurance contract are recognized as revenue on due date of policy holders.

Dalam penerapan kebijakan akuntansi Grup, seperti yang diungkapkan dalam Catatan 2 pada laporan keuangan konsolidasian, manajemen harus membuat estimasi, pertimbangan, dan asumsi atas nilai tercatat aset dan liabilitas yang tidak tersedia oleh sumber-sumber lain. Estimasi dan asumsi tersebut, berdasarkan pengalaman historis dan faktor lain yang dipertimbangkan relevan.

Manajemen berkeyakinan bahwa pengungkapan berikut telah mencakup ikhtisar estimasi, pertimbangan dan asumsi signifikan yang dibuat oleh manajemen, yang berpengaruh terhadap jumlah-jumlah yang dilaporkan serta pengungkapan dalam laporan keuangan konsolidasian.

Pertimbangan

Pertimbangan-pertimbangan berikut dibuat oleh manajemen dalam proses penerapan kebijakan akuntansi Grup yang memiliki dampak yang paling signifikan terhadap jumlah-jumlah yang diakui dalam laporan keuangan konsolidasian:

a. Klasifikasi Aset Keuangan dan Liabilitas Keuangan

Grup menentukan klasifikasi aset dan liabilitas tertentu sebagai aset dan liabilitas keuangan dengan menilai apakah aset dan liabilitas tersebut memenuhi definisi yang ditetapkan dalam PSAK No. 55. Aset keuangan dan liabilitas keuangan dicatat sesuai dengan kebijakan akuntansi Grup sebagaimana diungkapkan dalam Catatan 2.

b. Aset Keuangan yang Tidak Memiliki Kuotasi Harga di Pasar Aktif

Grup mengklasifikasikan aset keuangan dengan mengevaluasi, antara lain, apakah aset tersebut memiliki atau tidak memiliki kuotasi harga di pasar yang aktif. Evaluasi tersebut juga mencakup apakah kuotasi harga suatu aset keuangan di pasar yang aktif, merupakan kuotasi harga yang tersedia secara reguler, dan kuotasi harga tersebut mencerminkan transaksi di pasar yang aktual dan terjadi secara reguler dalam suatu transaksi wajar.

3. Management Use of Estimates, Judgments, and Assumptions

In the application of the Group's accounting policies, which are described in Note 2 to the consolidated financial statements, management is required to make estimates, judgments, and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and assumptions are based on historical experience and other factors that are considered to be relevant.

Management believes that the following represent a summary of the significant estimates, judgments, and assumptions made that affected certain reported amounts and disclosures in the consolidated financial statements.

Judgements

The following judgments are made by management in the process of applying the Group's accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements:

a. Classification of Financial Assets and Liabilities

The Group determines the classifications of certain assets and liabilities as financial assets and liabilities by judging if they meet the definition set forth in PSAK No. 55. Accordingly, the financial assets and liabilities are accounted for in accordance with the Group's accounting policies disclosed in Note 2.

b. Financial Assets Not Quoted in Active Market

The Group classifies financial assets by evaluating, among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether quoted prices are readily and regularly available, and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

c. Cadangan Kerugian Penurunan Nilai Aset Keuangan

Cadangan kerugian penurunan nilai pinjaman yang diberikan dan piutang dipelihara pada jumlah yang menurut manajemen adalah memadai untuk menutup kemungkinan tidak tertagihnya aset keuangan. Pada setiap tanggal laporan posisi keuangan konsolidasian, Grup secara spesifik menelaah apakah telah terdapat bukti obyektif bahwa suatu aset keuangan telah mengalami penurunan nilai (tidak tertagih).

Cadangan yang dibentuk adalah berdasarkan pengalaman penagihan masa lalu dan faktor-faktor lainnya yang mungkin mempengaruhi kolektibilitas, antara lain kemungkinan kesulitan likuiditas atau kesulitan keuangan yang signifikan yang dialami oleh debitur atau penundaan pembayaran yang signifikan.

Jika terdapat bukti obyektif penurunan nilai, maka saat dan besaran jumlah yang dapat ditagih diestimasi berdasarkan pengalaman kerugian masa lalu. Cadangan kerugian penurunan nilai dibentuk atas akun-akun yang diidentifikasi secara spesifik telah mengalami penurunan nilai. Akun pinjaman yang diberikan dan piutang dihapusbukan berdasarkan keputusan manajemen bahwa aset keuangan tersebut tidak dapat ditagih atau direalisasi meskipun segala cara dan tindakan telah dilaksanakan. Suatu evaluasi atas piutang, yang bertujuan untuk mengidentifikasi jumlah cadangan yang harus dibentuk, dilakukan secara berkala sepanjang tahun. Oleh karena itu, saat dan besaran jumlah cadangan kerugian penurunan nilai yang tercatat pada setiap periode dapat berbeda tergantung pada pertimbangan dan estimasi yang digunakan.

Nilai tercatat investasi yang dimiliki hingga jatuh tempo, pinjaman diberikan dan piutang Grup pada tanggal 31 Desember 2019 dan 2018 adalah sebagai berikut:

c. Allowance for Impairment of Financial Assets

Allowance for impairment losses is maintained at a level considered adequate to provide for potentially uncollectible receivables. The Group assesses specifically at each consolidated statement of financial position date whether there is an objective evidence that a financial asset is impaired (uncollectible).

The level of allowance is based on past collection experience and other factors that may affect collectability such as the probability of insolvency or significant financial difficulties of the debtors or significant delay in payments.

If there is an objective evidence of impairment, timing and collectible amounts are estimated based on historical loss data. Allowance is provided on accounts specifically identified as impaired. Written off loans and receivables are based on management's decisions that the financial assets are uncollectible or cannot be realized in whatsoever actions have been taken. Evaluation of receivables to determine the total allowance to be provided is performed periodically during the year. Therefore, the timing and amount of allowance recorded at each period might differ based on the judgments and estimates that have been used.

The carrying value of the Group's held to maturity investments, and loans and receivables as of December 31, 2019 and 2018 are as follows:

d. Cadangan kerugian penurunan nilai aset keuangan tersedia untuk dijual

Grup berpedoman pada PSAK No. 55 untuk menentukan apakah terjadi penurunan nilai atas investasi tersedia untuk dijual. Penentuan tersebut mensyaratkan pertimbangan yang signifikan. Dalam membuat pertimbangan tersebut, Grup mengevaluasi, antara lain, lamanya dan sejauh mana nilai wajar investasi tersebut berada di bawah biaya perolehannya; tingkat kesehatan keuangan serta gambaran bisnis jangka pendek dari *investee*, termasuk faktor-faktor seperti kinerja industri dan sektor industri, perubahan teknologi serta arus kas operasi serta pendanaan.

e. Komitmen Sewa

Komitmen Sewa Pembiayaan – Grup Sebagai Lessee

Grup telah menandatangani sejumlah perjanjian kendaraan. Grup menentukan bahwa sewa tersebut adalah sewa pembiayaan, karena sewa tersebut memberikan opsi beli pada akhir masa sewa dan Grup menanggung secara signifikan seluruh risiko dan manfaat dari kepemilikan aset-aset tersebut.

f. Pajak Penghasilan

Pertimbangan yang signifikan dibutuhkan untuk menentukan jumlah pajak penghasilan. Terdapat sejumlah transaksi dan perhitungan yang menimbulkan ketidakpastian penentuan jumlah pajak penghasilan karena interpretasi atas peraturan pajak yang berbeda. Jika hasil pemeriksaan pajak berbeda dengan jumlah yang sebelumnya telah dibukukan, maka selisih tersebut akan berdampak terhadap aset dan liabilitas pajak kini dan tangguhan dalam periode dimana hasil pemeriksaan tersebut terjadi.

Estimasi dan Asumsi

Asumsi utama mengenai masa depan dan sumber utama lain dalam mengestimasi ketidakpastian pada tanggal pelaporan yang mempunyai risiko signifikan yang dapat menyebabkan penyesuaian material terhadap nilai tercatat aset dan liabilitas dalam periode berikutnya diungkapkan di bawah ini. Grup mendasarkan asumsi dan estimasi pada parameter yang tersedia saat laporan keuangan konsolidasian disusun. Kondisi yang ada dan asumsi mengenai perkembangan masa depan dapat berubah karena perubahan situasi pasar yang berada di luar kendali Grup. Perubahan tersebut tercermin dalam asumsi ketika keadaan tersebut terjadi:

d. Allowance for Impairment of AFS Financial Assets

The Group follows the guidance of PSAK No. 55 to determine when an AFS equity investment is impaired. This determination requires significant judgment. In making this judgment, the Group evaluates, among other factors, the duration and extent to which the fair value of an investment is less than its cost; and the financial health of and short-term business outlook for the investee, including factors such as industry and sector performance, changes in technology and operational and financing cash flow.

e. Lease Commitments

Finance Lease Commitments - Group as Lessee

The Group has entered into various lease agreements for commercial spaces. The Group has determined that it is an operating lease since the Group does not bear substantially all the significant risks and rewards of ownership of the related assets.

f. Income Taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain due to different interpretation of tax regulations. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will have an impact on the current and deferred income tax assets and liabilities in the period in which such determination is made.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are disclosed below. The Group based its estimates and assumptions on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments may change due to market changes on circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur:

a. Nilai Wajar Aset Keuangan

Standar Akuntansi Keuangan di Indonesia mensyaratkan pengukuran aset keuangan tertentu pada nilai wajarnya, dan penyajian ini mengharuskan penggunaan estimasi. Komponen pengukuran nilai wajar yang signifikan ditentukan berdasarkan bukti-bukti obyektif yang dapat diverifikasi (seperti nilai tukar, suku bunga), sedangkan saat dan besaran perubahan nilai wajar dapat menjadi berbeda karena penggunaan metode penilaian yang berbeda.

Nilai wajar aset keuangan diungkapkan pada Catatan 21.

b. Estimasi Masa Manfaat Aset Tetap

Masa manfaat dari masing-masing aset tetap Grup diestimasi berdasarkan jangka waktu aset tersebut diharapkan tersedia untuk digunakan. Estimasi tersebut didasarkan pada penilaian kolektif berdasarkan bidang usaha yang sama, evaluasi teknis internal dan pengalaman dengan aset sejenis. Estimasi masa manfaat setiap aset ditelaah secara berkala dan diperbarui jika estimasi berbeda dari perkiraan sebelumnya yang disebabkan karena pemakaian, usang secara teknis atau komersial serta keterbatasan hak atau pembatasan lainnya terhadap penggunaan aset. Dengan demikian, hasil operasi di masa mendatang mungkin dapat terpengaruh secara signifikan oleh perubahan dalam jumlah dan waktu terjadinya biaya karena perubahan yang disebabkan oleh faktor-faktor yang disebutkan di atas. Penurunan estimasi masa manfaat ekonomis setiap aset tetap akan menyebabkan kenaikan beban penyusutan dan penurunan nilai tercatat aset tersebut.

Masa manfaat aset tetap diungkapkan pada Catatan 2.

Nilai tercatat aset tetap konsolidasian pada tanggal 31 Desember 2019 dan 2018 adalah Rp 67.512.715.635 dan Rp 59.951.428.986.

a. Fair Value of Financial Assets

Indonesian Financial Accounting Standards require measurement of certain financial assets at fair values, and the disclosure requires the use of estimates. Significant component of fair value measurement is determined based on verifiable objective evidence (i.e. foreign exchange rate, interest rate), while timing and amount of changes in fair value might differ due to different valuation method used.

The fair value of financial assets are set out in Note 21.

b. Estimated Useful Lives of Property and Equipment

The useful life of each of the item of the Group's property and equipment are estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of similar business, internal technical evaluation and experience with similar assets. The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence, and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above. A reduction in the estimated useful life of any item of property and equipment would increase the recorded depreciation and decrease the carrying values of this asset.

The useful lives of property and equipment are set out in Note 2.

The carrying values of property and equipment as of December 31, 2019 and 2018 amounted Rp 67,512,715,635 and Rp 59,951,428,986, respectively.

Nilai tercatat aset non-keuangan tersebut pada tanggal 31 Desember 2019 dan 2018 adalah sebagai berikut:

| | 2019 | 2018 | |
|-----------------------------------------------------|------------------------|------------------------|-------------------------------------------------------|

c. Impairment of Non-Financial Assets

Determining the fair value of assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. Any significant changes in the assumptions used in determining the fair value may materially affect the assessment of recoverable values and any resulting impairment loss could have a material impact on results of operations.

Pada tanggal 31 Desember 2019 dan 2018, liabilitas manfaat polis masa depan masing-masing sebesar Rp 283.189.012.872 dan Rp 265.376.687.244 (Catatan 19).

Aset Reasuransi

Aset yang timbul dari kontrak reasuransi juga dihitung dengan menggunakan metode yang sama dengan liabilitas kontrak asuransi. Selain itu, pemulihan aset ini dinilai secara periodik untuk memastikan bahwa jumlahnya mencerminkan jumlah yang pada akhirnya akan diterima, mempertimbangkan faktor-faktor seperti *counterparty* dan risiko kredit. Penurunan nilai diakui di mana terdapat bukti objektif bahwa Perusahaan tidak dapat menerima jumlah yang terutang untuk itu dan jumlah ini dapat diukur secara andal.

Pengujian Kecukupan Liabilitas

Pada tanggal pelaporan, keseluruhan jumlah liabilitas asuransi yang dicatat meliputi cadangan premi dan cadangan klaim, telah dilakukan pengujian kecukupan liabilitas dengan menggunakan perhitungan teknik aktuaria yang menggunakan asumsi dan estimasi aktuaria masa depan. Manajemen meyakini bahwa hasil tes kecukupan liabilitas pada tanggal pelaporan telah memadai.

Tes atas kecukupan liabilitas asuransi Perusahaan pada tanggal 31 Desember 2019 dan 2018 dilakukan oleh aktuaris independen, PT Sienco Aktuarindo Utama, dalam laporannya masing-masing tertanggal 23 Maret 2020 dan 26 Maret 2019.

As of December 31, 2019 and 2018, liability for future policy benefits amounted to Rp 283,189,012,872 and Rp 265,376,687,244, respectively (Note 19).

Reinsurance Assets

Assets arising from reinsurance contracts are also computed using the same methods as insurance contract liabilities. In addition, the recoverability of these assets is assessed on a periodic basis to ensure that the balance is reflecting the amounts that will ultimately be received, taking into consideration factors such as counterparty and credit risk. f. Imbalan Kerja Jangka Panjang

Penentuan liabilitas imbalan kerja jangka panjang dipengaruhi oleh asumsi tertentu yang digunakan oleh aktuaris dalam menghitung jumlah tersebut. Asumsi tersebut dijelaskan dalam Catatan 32 dan mencakup, antara lain, tingkat kenaikan gaji, dan tingkat diskonto yang ditentukan dengan mengacu pada imbal hasil pasar atas bunga obligasi pemerintah berkualitas tinggi dalam mata uang yang sama dengan mata uang pembayaran imbalan dan memiliki jangka waktu yang mendekati estimasi jangka waktu liabilitas imbalan kerja jangka panjang tersebut. Hasil aktual yang berbeda dengan asumsi Grup dibukukan pada penghasilan komprehensif lain dan dengan demikian, berdampak pada jumlah penghasilan komprehensif lain yang diakui dan liabilitas yang tercatat pada periode-periode mendatang. Manajemen berkeyakinan bahwa asumsi-asumsi yang digunakan adalah tepat dan wajar, namun demikian, perbedaan signifikan pada hasil aktual, atau perubahan signifikan dalam asumsi-asumsi tersebut dapat berdampak signifikan pada jumlah liabilitas imbalan kerja jangka panjang.

Pada tanggal 31 Desember 2019 dan 2018, liabilitas imbalan kerja jangka panjang konsolidasian masing-masing sebesar Rp 27.703.172.574 dan Rp 21.766.197.545 (Catatan 32).

g. Aset Pajak Tangguhan

Estimasi manajemen yang signifikan diperlukan untuk menentukan jumlah aset pajak tangguhan yang diakui berdasarkan kemungkinan waktu terealisasinya dan jumlah laba kena pajak pada masa mendatang serta strategi perencanaan pajak masa depan.

Pada tanggal 31 Desember 2019 dan 2018, saldo aset pajak tangguhan konsolidasian masing-masing sebesar Rp 28.204.393.672 dan Rp 22.729.267.258 (Catatan 33).

f. Long-term Employee Benefits

The determination of the long-term employee benefits is dependent on the selection of certain assumptions used by actuary in calculating such amounts. Those assumptions are described in Note 32 and include, among others, rate of salary increase, and discount rate which is determined after giving consideration to interest rates of high-quality government bonds that are denominated in the currency in which the benefits are to be paid and have terms of maturity approximating the terms of the related employee benefits liability. Actual results that differ from the Group's assumptions are charged to comprehensive income and therefore, generally affect the recognized comprehensive income and recorded obligation in such future periods. While it is believed that the Group's assumptions are reasonable and appropriate, significant differences in actual experience or significant changes in assumptions may materially affect the amount of long-term employee benefits liability.

As of December 31, 2019 and 2018, consolidated long-term employee benefits liability amounted to Rp 27,703,172,574 and Rp 21,766,197,545, respectively (Note 32).

As of December 31, 2019 and 2018, consolidated deferred tax assets amounted to Rp 28,204,393,672 and Rp 22,729,267,258, respectively (Note 33).

Manajemen berpendapat klaim atas pertanggungan ini adalah layak, sesuai dengan laporan dari penilai independen (*loss adjuster*) yang direkomendasikan oleh MRI dan Surat Keputusan Mahkamah Pelayaran, sehingga Perusahaan telah melunasi klaim kepada PPL. Perusahaan telah mengajukan gugatan kepada MRI sehubungan dengan piutang ini. Selanjutnya, Perusahaan mengajukan kasasi ke Mahkamah Agung.

As of December 31, 2019 and 2018, reinsurance receivable amounting to Rp 40,372,847,998 and Rp 123,435,486,284, respectively, have been compensated against reinsurance payable (Note 16).

In 2005, the balance of reinsurance receivables which are outstanding for more than sixty (60) days include Rp 14,800,000,000 of reinsurance receivable from PT Mandiri Re International (MRI) relating to the recovery of claim of PT Pagaruyung Prasetya Lines (PPL).

Management believes that this reinsurance claim is reasonable based on the report of the loss adjuster recommended by MRI and the decision letter of the Maritime Court of Justice. The Company had paid the claim to PPL and filed a lawsuit against MRI relating to this receivable. The case had been decided in the District Court of South Jakarta which was in favor of the Company, and in the High Court of Jakarta which was in favor of MRI. The Company appealed to the court session in the Supreme Court.

In 2006, the Company received payment amounting to Rp 4,721,600,000 from PT Southpoint Recoveries, a company providing services in handling recovery claims, and had been recorded as a deduction from receivable from MRI, thus, as of December 31, 2006, the outstanding reinsurance balance amounted to Rp 10,078,400,000.

On January 22, 2008, the case between the Company and MRI had been decided by the Supreme Court which was in favor of the Company. The result of the decision included that MRI has to pay the obligation amounting to Rp 14,800,000,000 with 6% interest per annum on the obligation from the date that this decision is effective until the obligation is fully paid.

On December 29, 2009, the Company received payment from the auction of MRI's shophouses amounting to Rp 2,827,520,000. As of December 31, 2019, management write-off MRI receivables because MRI was unable to pay off the remaining obligation.

Nilai wajar instrumen keuangan yang diperdagangkan di pasar aktif adalah berdasarkan kuotasi harga pasar pada tanggal pelaporan. Pasar dianggap aktif apabila kuotasi harga tersedia sewaktu-waktu dan dapat diperoleh secara rutin dari bursa, pedagang efek atau perantara efek, badan penyedia jasa penentuan harga kelompok industri atau badan pengatur, dan harga tersebut mencerminkan transaksi pasar yang aktual dan rutin dalam suatu transaksi yang wajar. Kuotasi harga pasar yang digunakan untuk aset keuangan yang dimiliki oleh Grup adalah harga penawaran (*bid price*) terkini. Instrumen keuangan seperti ini termasuk dalam hirarki Level 1. Nilai wajar efek yang tersedia untuk dijual diukur berdasarkan kuotasi harga pasar pada tanggal 31 Desember 2019 dan 2018.

Nilai wajar instrumen keuangan yang tidak diperdagangkan di pasar aktif ditentukan menggunakan teknik penilaian. Teknik penilaian ini memaksimalkan penggunaan data pasar yang dapat diobservasi yang tersedia dan sesedikit mungkin mengandalkan estimasi spesifik yang dibuat oleh entitas. Jika seluruh input signifikan yang dibutuhkan untuk menentukan nilai wajar dapat diobservasi, maka instrumen tersebut termasuk dalam hirarki Level 2.

Nilai wajar Aset Non-keuangan

Informasi tentang pengukuran nilai wajar untuk aset non-keuangan yang termasuk hirarki Level 2 adalah sebagai berikut:

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer or broker, industry group pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transaction on an arm's lengths basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in Level 1. The fair value of AFS equity and debt securities are measured based on the latest published quoted price as of December 31, 2019 and 2018.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. These valuation techniques maximize the use of observable market data where it is available and rely as little as possible on entity's specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in Level 2.

Fair value of Non-financial Assets

The information about fair value measurements of non-financial assets categorized as Level 2 follows:

36. Tujuan dan Kebijakan Risiko Manajemen Keuangan

Risiko Asuransi

Risiko utama yang dihadapi Grup terkait dengan kontrak asuransi adalah perbedaan antara jumlah klaim yang terjadi, manfaat yang dibayarkan dan waktu terjadinya klaim dengan yang diprediksikan sebelumnya. Hal ini dipengaruhi oleh frekuensi, tingkat keparahan (severity) dari klaim, manfaat aktual yang dibayarkan, dan perkembangan dari klaim jangka panjang. Oleh karena itu, tujuan Grup adalah untuk memastikan bahwa cadangan yang dibentuk cukup untuk memenuhi semua liabilitas tersebut.

Eksposur risiko yang terkait dengan kontrak asuransi dapat dimitigasi dengan melakukan diversifikasi portofolio kontrak asuransi dan area geografis. Keberagaman risiko diperbaiki juga melalui pemilihan risiko dengan hati-hati dan implementasi dari pedoman underwriting serta pengaturan program reasuransi.

36. Risk Management Objectives and Policies

Insurance Risk Management

The principal risk of the Group faces under insurance contracts is the difference between actual claims, benefit payments and claim dates from the one predicted previously. This is influenced by the frequency, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the Group is to ensure that sufficient reserves are made to cover those liabilities.

The risk exposure related to insurance contracts is mitigated by diversification of insurance contracts portfolio and geographical areas. The variability of risks is also improved by prudent risks selection and implementation of underwriting strategy guidelines, as well as reinsurance program arrangements.

Perusahaan tidak tergantung pada satu reasuradur ataupun satu kontrak reasuransi tertentu secara signifikan.

The Company is not significantly dependent upon any single reinsurance company or reinsurance contract.

Asumsi Utama

Main Assumptions

Asumsi utama yang menjadi dasar dalam perhitungan estimasi kewajiban klaim yaitu bahwa pembentukan klaim masa depan Perusahaan akan memiliki pola yang sama dengan pembentukan klaim yang terjadi di masa lampau. Termasuk asumsi dari rata-rata beban klaim, beban penanganan klaim, faktor inflasi klaim, dan jumlah klaim untuk setiap tahun kecelakaan. Justifikasi kualitatif tambahan digunakan untuk memperkirakan tingkat di mana tren masa lampau tidak akan terulang lagi di masa depan, misalnya; kejadian khusus yang hanya terjadi sekali, perubahan yang terjadi di pasar seperti sikap masyarakat terhadap klaim, kondisi ekonomi maupun faktor internal seperti campuran portofolio, syarat dan ketentuan polis dan prosedur penanganan klaim.

The principal assumption in calculating the claim reserve estimations is that the Company's future claims development will follow a similar pattern to historical claims development. This includes assumptions on average claim costs, claim handling costs, claim inflation factors and claim numbers for each accident year. Additional qualitative judgments are used to assess the extent to which historical trends may not apply in the future, for example: specific one off occurrence, changes in market factors such as public attitude to insurance claims, economic conditions, as well as internal factors such as portfolio mix, policy terms and conditions and claims handling procedures.

Justifikasi lebih lanjut digunakan untuk menghitung tingkat di mana faktor eksternal seperti keputusan peradilan dan peraturan pemerintah yang mempengaruhi estimasi besaran klaim. Kondisi utama yang mempengaruhi keandalan dari asumsi yang digunakan adalah rasio kerugian, perbedaan tingkat bunga, keterlambatan dalam penyelesaian dan perubahan nilai tukar mata uang asing.

Sensitivitas

Liabilitas klaim sangat sensitif terhadap asumsi utama yang digunakan. Hingga saat ini adalah hal yang tidak mungkin untuk dapat menentukan tingkat sensitivitas dari beberapa asumsi seperti perubahan perundangan atau ketidakpastian dalam proses estimasi. Analisa berikut dibuat untuk menunjukkan pengaruh terhadap laporan laba rugi apabila asumsi utama diubah dengan semua asumsi lain dianggap tetap. Korelasi antara asumsi-asumsi yang ada dapat memberikan dampak yang signifikan dalam menentukan liabilitas klaim. Dampak atas perubahan kenaikan (penurunan) rasio kerugian sebesar 5% terhadap tahun berjalan adalah sebagai berikut:

Further justification is required to assess the extent to which external factors such as judicial decisions and government regulations affect the claim estimates. Other key conditions affecting the reliability of assumption used are loss ratio, variations in interest rates, delay in settlement and changes in foreign currency exchange rates.

Sensitivities

Claim liabilities are very volatile to key assumptions used. It is not possible to quantify the sensitivity of certain assumptions such as regulation change or uncertainty in the estimation process. The following analysis is made to show the impact on the consolidated statement of profit or loss and other comprehensive income if the main assumptions were changed while all the other assumptions stay. The correlation between assumptions can give significant impact in determining the claim liability. The impact of the increase (decrease) of loss ratio of 5% against the current year are as follows:

**Pengaruh pada Laba Bersih/
*Impact on Net Profit***

| | | |
|-----------------------------------|------|------------------|
| Rasio kerugian/ <i>Loss ratio</i> | + 5% | 53.243.671.652 |

Risiko Keuangan

Risiko-risiko utama yang timbul dari instrumen keuangan yang dimiliki Grup adalah risiko harga, risiko suku bunga, risiko kredit, dan risiko likuiditas. Kegiatan operasional Grup dijalankan secara berhati-hati dengan mengelola risiko-risiko tersebut agar tidak menimbulkan potensi kerugian bagi Grup.

Risiko Harga

Grup memiliki investasi pada saham entitas lain yang diperdagangkan di bursa, termasuk di dalamnya adalah pada efek ekuitas berikut: PT Maskapai Reasuransi Indonesia Tbk (MREI), PT Kalbe Farma Tbk (KLBF), dan PT Enseval Tbk (EPMT).

Tabel dibawah ini mengikhtisarkan dampak kenaikan/penurunan harga pasar ekuitas tersebut di atas pada laba setelah pajak Grup untuk tahun berjalan dan dampak pada komponen ekuitas lainnya. Analisa ini didasarkan pada asumsi bahwa harga pasar telah naik/turun sebesar 9% dan seluruh variabel lain konstan.

Risiko Nilai Tukar

Risiko nilai tukar adalah risiko dimana nilai wajar atau arus kas kontraktual masa datang dari suatu instrumen keuangan akan terpengaruh akibat perubahan nilai tukar.

Risiko nilai tukar dikaitkan dengan kewajiban yang harus dilunasi dibandingkan pendapatan yang diterima dalam bentuk valuta asing. Disamping itu potensi risiko nilai tukar juga dapat terjadi karena perbedaan waktu pencatatan pendapatan dengan kewajiban pada saat nilai tukar fluktuatif. Risiko nilai tukar dimitigasi dengan melakukan pengendalian risiko nilai tukar melalui penerapan prinsip kehati-hatian dan pemilihan strategi yang tepat (lindung nilai) terhadap penyediaan dana dan transaksi yang mencakup risiko dalam valuta asing, serta menerapkan kepatuhan dalam pencatatan.

Financial Risk Management

The main risks arising from the Group's financial instruments are price risk, credit risk, and liquidity risk. The operational activities of the Group are managed in a prudent manner by managing those risks to minimize potential losses.

Price Risk

The Group's investments in equity of other entities are PT Maskapai Reasuransi Indonesia Tbk (MREI), PT Kalbe Farma Tbk (KLBF), and PT Enseval Tbk (EPMT).

The table below summarizes the impact of increases/decreases of the equity index on the Group's post-tax profit for the period and on other equity components. The analysis is based on the assumption that the equity indexes had increased/decreased by 9% with all other variables held constant.

Foreign Exchange Risk

Foreign exchange rate risk is the risk that the fair value or future contractual cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

This risk is related to liabilities to be settled compared with expected earnings in foreign exchange currencies. Exchange rates risk may also occur due to time difference between recording of income and liability as a result of fluctuations of exchange rates. Exchange rates risk is mitigated by applying prudent underwriting and selecting appropriate strategies towards funding utilization and transactions carried out in foreign currencies as well as applying compliance with recording.

Pada tanggal 13 Maret 2014, *principal*, PT Saripari Pertiwi Abadi selaku penggugat mencabut Gugatan No. 448/PDT.G/2013/2013/PN.Jkt.Pst.

Pada tanggal 27 Juni 2014, PT Saripari Pertiwi Abadi melakukan gugatan perdata kepada PT Chevron Pacific Indonesia karena PT Saripari Pertiwi Abadi belum sepenuhnya menyetujui amar putusan Surat Putusan Pengadilan Niaga Jakarta Pusat No. 25/Pdt.Sus/PKPU/2013/PN.Niaga.Jkt.Pst. Perkara tersebut masih berlangsung di Pengadilan Negeri Jakarta Pusat No. 319/Pdt.G/2014/PN.Jkt.Pst, sehingga Surat Putusan Pengadilan Niaga Jakarta Pusat No. 25/Pdt.Sus/PKPU/2013/PN.Niaga.Jkt.Pst belum dapat dilaksanakan, menunggu putusan tetap perkara perdata No. 319/Pdt.G/2014/PN.Jkt.Pst.

On October 30, 2012, the Company settled the claim of the performance bonds amounting to US\$ 2,110,050 and charged the amounts to the principal. However, since there was a change in the contract value in 2009 from US\$ 42,202,000 to US\$ 37,091,971, the performance bonds amount should be changed to US\$ 1,854,599.

On September 23, 2013, the principal filed a law suit against PT Chevron Pacific Indonesia, as the Insured, and the Company, as the issuer, with No. 448/Pdt.G/2013/PN.Jkt.Pst for the disbursement of the performance bonds.

On November 22, 2013, there was a collective Agreement No. 02094/SPKB/SP-RMY/DIR/XI/13, wherein the principal agreed to pay the related payable on the disbursement of performance bonds in five (5) years installment to the Company.

On December 2, 2013, the Central Jakarta Commercial Courts approved the agreement No. 02094/SPKB/SPA-RMY/DIR/XI/13 dated November 22, 2013 based on his Decision Letter No. 25/Pdt.Sus/PKPU/2013/PN.Niaga.Jkt.Pst.

On March 13, 2014, PT Saripari Pertiwi Abadi, the principal, as plaintiff, has revoked the lawsuit related to the issuance of performance bond based on Decision Letter No. 448/Pdt.G/2013/PN.Jkt.Pst.

On June 27, 2014, PT Saripari Pertiwi Abadi filed a civil lawsuit against PT Chevron Pacific Indonesia, because PT Saripari Pertiwi Abadi has not fully agreed with the Central Jakarta Commercial Courts Decision Letter No. 25/Pdt.Sus/ PKPU/2013/PN.Niaga.Jkt.Pst. The case is still on going in Central Jakarta District Court under case file No. 319/Pdt.G/2014/PN.Jkt.Pst, therefore the Central Jakarta Commercial Courts Decision Letter No. 25/Pdt.Sus/PKPU/2013/PN.Niaga.Jkt.Pst as discussed above cannot be implemented yet until there is permanent decision of the civil case No. 319/Pdt.G/2014/ PN.Jkt.Pst.

Pada tanggal 21 Juli 2014, Perusahaan mengajukan gugatan kepada PT Chevron Pacific Indonesia atas pencairan *performance bond* No. 16.9463.02.08.0472, dengan No. Registrasi Perkara 357/Pdt.G/2014/PN.Jkt.Pst di Pengadilan Negeri Jakarta Pusat dimana Perusahaan menuntut pengembalian dana pencairan sebesar US\$ 2.110.050.

PT Chevron Pacific Indonesia mengajukan Eksepsi Kompetensi Absolut, bahwa hal ini tersebut tidak bisa diperiksa di Pengadilan Negeri Jakarta Pusat melainkan harus diperiksa di SIAC (*Singapore International Arbitration Centre*). Perusahaan mengajukan bantahan, bahwa sebagai penjamin, Perusahaan tidak tunduk pada Kontrak 4373-OK yang dibuat oleh dan antara PT Chevron Pacific Indonesia (*Obligee*) dan PT Saripari Pertiwi Abadi (*principal*) tentang Arbitrase dan hanya tunduk semata kepada Performance Bond, sesuai kaidah Pasal 1340 KUHPPerdata.

Bahwa eksepsi Kompetensi Absolut yang diajukan Chevron telah ditolak oleh Pengadilan Negeri Jakarta Pusat, melalui Keputusan Sela No. 357/Pdt.G/2014/PN.Jkt.Pst, tanggal 13 Januari 2015, dan Pengadilan Negeri Jakarta Pusat menyatakan berwenang untuk memeriksa dan mengadili perkara gugatan perbuatan melawan hukum yang diajukan oleh Perusahaan.

Perkara No. 357/Pdt.G/2014/PN.Jkt.Pst telah diputus oleh Majelis Hakim tanggal 5 Mei 2015, dengan Amar Putusan menyatakan Chevron (Tergugat) terbukti melakukan perbuatan melawan hukum, menyatakan batal demi hukum dan tidak mempunyai kekuatan hukum Performance Bond No. 16.9463.02.08.0472, dan menghukum Chevron (Tergugat) untuk mengembalikan seluruh dana pencairan *Performance Bond* tersebut sebesar USD 2.110.050 kepada Perusahaan (Penggugat) secara tunai.

Terhadap Putusan No. 357/Pdt.G/2014/PN.Jkt.Pst tersebut Chevron mengajukan Banding ke Pengadilan Tinggi DKI Jakarta dan pada tanggal 13 Januari 2016, Pengadilan Tinggi DKI Jakarta melalui putusannya No. 577/Pdt/2015/PT.DKI telah memberikan Amar Putusan, menguatkan Putusan Pengadilan Negeri Jakarta Pusat No. 357/Pdt.G/2014/PN.Jkt.Pst.

On July 21, 2014, the Company filed a lawsuit against PT Chevron Pacific Indonesia for the disbursement of performance bond No. 16.9463.02.08.0472, under Case File No. 357/Pdt.G/2014/PN.Jkt.Pst in the Central Jakarta District Court which the Company demanded a refund on the disbursement of US\$ 2,110,050.

Subsequently, PT Chevron Pacific Indonesia (Chevron) filed Exception Absolute Competence with regards to International Arbitrage, which this matter could not be tried in Central Jakarta District Court but through SIAC (Singapore International Arbitration Centre). The Company, as a surety, filed a dispute stating that the Company is not a party to the Contract 4373-OK entered into between Chevron and Saripari related to arbitration and is only subject to the transaction related to performance bond in accordance with article 1340 KUHPPerdata.

The Central Jakarta District Court rejected the Exception Absolute Competence submitted by PT Chevron Pacific Indonesia through Decree No. Sela 357 357/Pdt.G/2014/PN.Jkt.Pst, dated January 13, 2015, and ordered that this case will be discussed upon the Company's submission of document.

The verdict of the lawsuit as documented in Case No. 357/Pdt.G/2014/PN.Jkt.Pst as declared by the judges dated May 5, 2015 stated that Chevron (defendant) is guilty of an unlawful act, declared null and void and has no legal force on Performance Bond No. 16.9463.02.08.0472, and penalize to return all funds related to such Performance Bond amounting to USD 2,110,050 to the Company (plaintiff) in cash.

In relation to the Case No. 357/Pdt.G/2014/PN.Jkt.Pst, Chevron filed an appeal to the Jakarta High Court on January 13, 2016. The result of the decision as documented in Decision No. 577/Pdt/2015/PT.DKI strengthen the previous verdict of Central Jakarta District Court No. 357/Pdt.G/2014/PN.Jkt.Pst dated May 5, 2015.

Chevron mengajukan Kasasi atas putusan Judex Factie, Pengadilan Negeri dan Pengadilan Tinggi, yaitu No.357/Pdt.G/2014/PN.Jkt.Pst dan No.557/Pdt/2015/PT.DKI. Mahkamah Agung menerima permohonan Kasasi yang diajukan oleh Chevron sesuai dengan Surat Keputusan No.3665 K/Pdt/2016 tanggal 15 Agustus 2017.

Pada tanggal 8 Oktober 2018, Mahkamah Agung, melalui surat putusan No. 731PK/PDT/2018, mengabulkan permohonan Peninjauan Kembali dari Perusahaan, membatalkan Putusan Mahkamah Agung No. 3665 K/Pdt/2016 tanggal 15 Agustus 2017, yang membatalkan Putusan Pengadilan Tinggi Jakarta No. 577/PDT/2015/PT.DKI tanggal 19 Januari 2016 yang menguatkan Putusan Pengadilan Negeri Jakarta Pusat No. 357/PDT.G/2014/PN.JKT.PST tanggal 5 Mei 2015.

Perusahaan kemudian mengajukan Permohonan Peninjauan Kembali (PK) atas putusan Kasasi No.3665 K/PDT/2016, dan Mahkamah Agung telah mengabulkan permohonan PK tersebut lewat Putusannya No. 731 PK/PDT/2018 tanggal 8 Oktober 2018, dengan membatalkan Putusan Kasasi – No.3665 K/PDT/2016 tersebut.

Dengan demikian, Perusahaan mengakui pendapatan lain sebesar Rp. 30.555.634.050. Pada tanggal 31 Desember 2018, jumlah tersebut dibukukan pada akun piutang lain-lain (Catatan 7).

Akan tetapi, Chevron kembali mengajukan permohonan PK kedua atas Putusan PK No. 731 PK/PDT/2018, yang sebetulnya tidak lazim dalam tertib hukum acara Perdata, sehingga memaksa perkara ini diperiksa kembali di Mahkamah Agung dengan Register Perkara No. 50 PK/PDT/2020, yang saat ini masih dalam proses dan menunggu putusan akhir.

Chevron filed Cassation to the Supreme Court for the Judex Factie Decision of the District Court and High Court No. 357/Pdt.G/2014/PN.Jkt.Pst and No. 577/Pdt/2015/PT.DKI. The Supreme Court accepted the cassation in accordance with the Decision Letter No. 3665 K/Pdt/2016 dated August 15, 2017.

On October 8, 2018, the Supreme Court, through a decision letter No. 731PK/PDT/2018, granted the Company's appeal for a Judicial Review, canceling the Supreme Court Decision No. 3665 K/Pdt/2016 dated August 15, 2017, which canceled the Decision of the Jakarta High Court No. 577/PDT/2015/PT.DKI dated January 19, 2016 which corroborated the Decision of the Central Jakarta District Court No. 357/PDT.G/2014/PN.JKT.PST dated May 5, 2015.

The company then submitted a request civil (PK) for a review of the Cassation Decision No. 3665 K/PDT/2016, and the Supreme Court has granted the request civil of the Company through its decision No. 731 PK/PDT/2018 dated October 8, 2018, by canceling the Cassation Decision No. 3665 K/PDT/2016.

Accordingly, the Company recognized other income amounting to Rp 30,555,634,050. As of December 31, 2018, the Company recognize in the others receivable (Note 7)

However, Chevron again submitted a request civil for a second review of PK Decision No.731 K/PDT/2018, which is actually uncommon in the civil procedural law, thus forcing this case to be re-examined in the Supreme Court of the Republic of Indonesia with case register No. 50 PK/PDT/2020, which is currently still in process and is awaiting for a final decision.

Perusahaan setiap saat wajib memenuhi tingkat solvabilitas minimum sebesar 120% yang dihitung menggunakan pendekatan *Risk Based Capital* (RBC) dari deviasi dalam pengelolaan kekayaan dan liabilitas. Tingkat solvabilitas dihitung dengan mengurangi seluruh liabilitas (kecuali pinjaman subordinasi) dari kekayaan yang diperkenankan.

Perhitungan tingkat solvabilitas tersebut mulai berlaku 1 Januari 2013.

Analisis Kekayaan dan Perhitungan Batas Tingkat Solvabilitas Dana Tabarru', Kekayaan yang Tersedia Untuk Qardh, dan Saldo Solvabilitas Dana Perusahaan Unit Usaha Sharia

Dana Tabarru'

Berdasarkan Peraturan Menteri Keuangan Republik Indonesia No. 11/PMK.10/2011 tanggal 12 Januari 2011, Unit usaha syariah setiap saat wajib memenuhi tingkat solvabilitas dana tabarru' yang dihitung dengan menggunakan pendekatan Risk Based Capital (RBC). Unit usaha syariah wajib memenuhi tingkat solvabilitas minimum sebesar 15% dari risiko kerugian yang mungkin timbul sebagai akibat dari deviasi dalam pengelolaan kekayaan dan liabilitas. Tingkat solvabilitas dihitung dengan mengurangi seluruh liabilitas (kecuali pinjaman subordinasi) dari kekayaan yang diperkenankan.

Batas tingkat solvabilitas minimum dihitung dengan mempertimbangkan kegagalan pengelolaan kekayaan, ketidakseimbangan antara proyeksi arus kekayaan dan liabilitas, ketidakseimbangan antara nilai kekayaan dan liabilitas dalam setiap jenis mata uang, perbedaan antara beban klaim yang terjadi dan beban klaim yang diperkirakan, ketidakcukupan premi akibat perbedaan hasil investasi yang diasumsikan dalam penetapan premi dengan hasil investasi yang diperoleh, ketidakmampuan pihak reasuradur untuk memenuhi liabilitas membayar klaim dan deviasi lainnya yang timbul dari pengelolaan kekayaan dan liabilitas.

Pada tanggal 31 Desember 2019 dan 2018, rasio pencapaian solvabilitas dana tabarru yang dihitung sesuai dengan Peraturan Otoritas Jasa Keuangan No. 72/POJK.05/2016 dan Peraturan Kementerian Keuangan Republik Indonesia No. 11/PMK.10/2011 adalah sebesar 194% dan 326%.

Asset Analysis and Computation of Solvency Margin of Tabarru' Fund, Assets Available for Qardh and Balance of Solvency Shareholders' Fund

Tabarru' Fund

Based on the Decree of Minister of Finance of the Republic of Indonesia No. 11/PMK.10/2011 dated January 12, 2011, Sharia Business Unit is required to fulfill a tabarru' fund solvency margin calculated based on the Risk Based Capital (RBC) Approach. Sharia Business Unit has to meet at all times a solvency margin of at least 15% of risk of loss that might arise from deviation of assets and liabilities management. Solvency margin is calculated by deducting all liabilities (except for subordinated loans) from admitted assets.

Minimum solvency margin is calculated by considering unsuccessful assets management, imbalance between projected flows of assets and liabilities, imbalance between assets and liabilities value in each currency, the differences between claims expense incurred and estimated claims expense, insufficient premium as a result of differences between investment income assumed in determining premiums and investment income earned, inability of reinsurer to pay claims and other deviations arising from assets and liabilities management.

As of December 31, 2019 and 2018, the Company's tabarru' fund solvency ratio which computed based on Financial Services Authority Regulation No. 72/POJK.05/2016 and the Decree of Minister of Finance of the Republic of Indonesia No. 11/PMK.10/2011 are 194% and 326%, respectively.

41. Ketidakpastian Kondisi Ekonomi

Perlambatan perekonomian global dan dampak negatif yang terjadi pada pasar finansial utama di dunia yang diakibatkan oleh pandemi virus Corona (Covid-19) telah menimbulkan volatilitas yang tinggi pada nilai wajar instrumen keuangan, terhentinya perdagangan, gangguan operasional perusahaan, pasar saham yang tidak stabil, volatilitas nilai tukar mata uang asing, dan likuiditas yang ketat pada sektor-sektor ekonomi tertentu di Indonesia, termasuk industri asuransi, yang dapat berkelanjutan dan berdampak terhadap keuangan dan operasional Grup.

Kemampuan Indonesia untuk meminimalkan dampak perlambatan perekonomian global terhadap perekonomian nasional sangat tergantung pada tindakan pemberantasan ancaman Covid-19 tersebut, selain kebijakan fiskal dan kebijakan lainnya yang diterapkan oleh Pemerintah. Kebijakan tersebut, termasuk pelaksanaannya dan kejadian yang timbul, berada di luar kontrol Grup.

Dampak yang secara khusus dialami Grup salah satunya adalah tertundanya pembayaran-pembayaran piutang premi dari nasabah akibat perlambatan industri tersebut yang berakibat pada tertundanya pembayaran kewajiban perusahaan. Selain itu efek melemahnya mata uang Rupiah juga berpengaruh terhadap pembayaran utang reasuransi Grup.

Secara umum, kondisi ini mempengaruhi pencapaian target premi karena banyak perusahaan menunda proses pengadaan ataupun tender asuransi.

42. Pengungkapan Tambahan Laporan Arus Kas Konsolidasian

Aktivitas investasi yang tidak mempengaruhi kas dan setara kas:

| | <u>2019</u> | <u>2018</u> | |
|------------------------------------------------------|----------------|----------------|----------------------------------------------------------------------|
| Penambahan aset tetap melalui sewa pembiayaan | 12.001.845.000 | 14.036.478.773 | Acquisition of property and equipment through capital lease |
| Penambahan aset tetap melalui penjualan entitas anak | - | - | Acquisition of property and equipment through disposed of subsidiary |

41. Economic Environment Uncertainty

The global economic slowdown and negative impact on major financial market caused by the pandemic of coronavirus (Covid-19) has resulted to increased volatility in the value of financial instruments, trading interruptions, disruptions to operations of companies, unstable stock market, volatility of foreign currency exchange rates and tight liquidity in certain sectors in Indonesia, including the insurance industry, which may continue and result to unfavorable financial and operating impact to the Group.

Indonesia's ability to minimize the impact of the global economic slowdown on the country's economy is largely dependent on the eradication of Covid-19 threat, as well as the fiscal and other measures that are being taken and will be undertaken by the government authorities. These measures, actions and events are beyond the Group's control.

The impact that is specifically experienced by the Group is that it delays payment of premiums receivable from customers due to slowing down the industry which resulted in the delayed payment of the Company's obligations. In addition, the weakening effect of the Rupiah currency also affects the payment of the Group's reinsurance payable.

In general, this condition also affects the achievement of premium target because many Group delay the procurement process or tender insurance.

42. Supplemental Disclosures on Consolidated Statements of Cash Flows

The following are the noncash investing and financing activities of the Group:
